

CERT Grants – for Social Housing Energy Efficiency projects

Who are we?

PECT Consultancy Ltd (PCL) is part of Peterborough Environment City Trust (PECT) - an environmental charity with 15 years experience in providing advice and assistance on energy efficiency and conservation. We deliver a range of services and have a high degree of expertise within the social housing sector.

What are CERT grants?

The Carbon Emissions Reduction Target (CERT) was launched in April 2008, and requires all major energy suppliers in the UK to meet targets for reducing domestic carbon emissions, with a heavy focus on the priority groups.

Energy suppliers are expected to spend around £2 Billion in order to meet their targets. This represents sizeable opportunity for Local Authorities and other Registered Social Landlords & private landlords to access funding to improve the energy efficiency and Energy Performance rating of housing stock.

Social housing organisations often miss out on the opportunity to obtain Funding for Energy Efficiency Projects.

PCL has a high degree of expertise and longstanding experience in the CERT and previous EEC grant mechanisms. PCL is able to leverage funding from utilities on your behalf, to help fund your energy saving projects. Typically, our grants are higher than those obtained by other agents due to our longstanding relationships with energy providers. We have helped Social housing organizations access hundreds of thousands of pounds of funding over the past year alone.

One of the most time consuming elements of CERT funding is the completion of the compulsory paperwork associated with claiming grants and monitoring the work once completed.

PCL manage this process for the RSL saving you time and effort.

Our CERT Funding Service can be adjusted for your requirements, we offer;

- Tender document preparation
- Post installation monitoring
- Liaison with your chosen contractor or sourcing local contractors for your project
- Completion of funding paperwork and delivery of funding

Currently we are able to source funding for the following measures;

- Loft Insulation
- Cavity Wall Insulation
- Solid Wall insulation
- Changing Fuel from Electricity/Solid Fuel to Gas

Further grants for renewable energy are yet to be announced and PCL can keep you updated of new funding as it occurs.

Key Benefits of the service

- Saving you time and money
- Ensuring Best Value delivery via our CERT providers
- Management of your program including all paper work and liaison with contractors
- Ensuring your tenants don't miss out on opportunities for energy efficiency
